Edgar Weippl, Univ.-Prof. Dipl.-Ing. Mag. Dr. techn.

1975

Functions

Vice dean	Faculty of Computer Science	2022/23–2023/24
Vice dean	Faculty of Computer Science	2024/25–2025/26

Discipline

Computer science
Security and Data Protection

Faculty

Faculty of Computer Science

Biography

Curriculum Vitae

1993-1997 Studies in Computer Science at the TU Wien
1994-2000 Studies in Business Administration (focus on languages) at the Vienna University of Economics and Business
1997-1999 PhD Thesis in Computer Science at the Institute of General Chemistry at the TU Wien
2000-2001 Visiting Assistant Professor at the faculty of Mathematics and Computer Science, Beloit College, USA
2001-2002 Assistant Area Manager with SCCH, Austria
2002-2004 Project Manager with ISIS Papyrus for health care (US) and financial institutions (Germany)
2004-2006 Researcher at TU Wien 2009 Habilitation at the TU Wien (venia docendi for applied informatics)
since 2006 Research Director with SBA Research (founded the research center SBA Research together with A Min Tjoa and Markus Klemen)
2009-2019 Head of CD-Laboratory for Security and Quality Improvement in Production Systems Engineering (since 2018), Privatdozent (~ Associate Professor) at TU Wien

since 2012 Visiting Lecturer and since 2021 Visiting Professor at the National Institute of Informatics (NII), Tokyo
2016 Invited Professor Université P. Sabatier, Toulouse
since 2006 Research Director with SBA Research (founded the research center SBA Research together with A Min Tjoa and Markus Klemen)
since January 2020 Professor for Security and Privacy, Faculty of Computer Science, University of Vienna

Research Areas

The research of Edgar Weippl focuses on fundamental and applied research on blockchain and distributed ledger technologies and security of production systems engineering. He will continue supporting SBA Research as Research Director; the integration with the University of Vienna will help to strengthen security and privacy research in the region of Vienna, opening many new opportunities.
